## Personal Statement

I am an ambitious problem solver with a passion for software development. I have a keen interest in technology, mobile applications, web applications, websites and user experience (UX).

I am a motivated and dedicated individual actively seeking for an opportunity to apply my skill set and contribute to dynamic software development team. I am proficient in problem solving, enabling me to navigate complex challenges with a positive mind-set. I am committed to delivering impactful, high quality solutions that enhances user experience and ensure seamless processes.

I possess a clear and concise thinking style, taking pride in collaborating with diverse teams and communicating effectively across all business line. Constantly striving for self-improvement, I engage in meaningful discussion to stay up to date with latest solution and trends in software development.
