Personal Statement

An ambitious Software developer with skills and experience in planning, organising, coordinating and supporting organisation to achieve their objectives. I have a keen interest in IT, Project support and business administration. I am committed to delivering impactful, high-quality solutions that enhances user experience and ensure seamless processes. I possess a clear and concise thinking style, taking pride in collaborating with diverse teams and communicating effectively across all business lines. I am actively seeking for an opportunity to apply my qualities, skills-set and experience to contribute to a dynamic software development team.

Qualities	**Skills**
• Hardworking	• Communication Skills
• Enthusiastic	• Team working Skills
• Committed	• Customer service Skills
• Dependable	• Computer Skills (MS Office Skills)
• Goal-oriented	• Problem solving skills
• Multi-task	• Technical Skills
• Attention to detail	• Analytical Skills (Coding, QR Codes, Web dev)
• Flexible and adaptable	• Leadership Skills

Knowledge and Competence

- Knowledge of JavaScript, React, node.js, Python, XML, HTML, CSS and Tailwind CSS.
- Collaborate with the development team to design, develop, and maintain web applications using React.js, Node.js, and JavaScript.
- Develop user-friendly, responsive front-end interfaces and ensure seamless integration with back-end services.
- Able to write clean, maintainable, and efficient code while adhering to best practices in software development.
- Attention to details and am able to debug and troubleshoot issues across the stack, identifying and implementing solutions in a timely manner.
- Participate in code reviews in open-source project, provide constructive feedback to peers and learn from other developers within the community.
- Work closely with stakeholders to understand business requirements and translate them into technical specifications.
- Assist in the testing and deployment of new releases, ensuring high-quality software is delivered to customers.
- Up to date with the latest industry trends, technologies, and best practices to continuously improve my skills and the quality of my software project.

Work Experience

- Wrote unit test to validate functionality of the form and address any bug or errors.
- Integrated the front-end of the application form website with necessary databases.
- Used version control system like Git to manage changes to the code.
- Communicated progress and updates to the stake holders throughout the development process.
- Conducted usability testing of the application form to gather feedback and make iterative improvement.
- Deployed the finalized application form website to production.
- Provided ongoing support and maintenance for the application form, addressing any issues or updates as

needed.

Freelance Photographer (January 2022 – Date)

- Meeting with clients to discuss their needs and expectations.
- Building and maintaining client relationships.
- Planning shoots, including scouting locations, choosing settings, and coordinating with clients for scheduling.
- Setting up equipment like cameras, lighting, and props for the shoot.
- Capturing high-quality images that meet the client's specifications.
- Editing photos using software like Adobe Photoshop or Lightroom to enhance the images.
- Delivering final images to clients in the required format.
- Staying up-to-date with photography trends, techniques, and industry best practices.
- Learning new software tools for photo editing and image management.
- Managing multiple projects simultaneously and scheduling shoots efficiently to meet deadlines.

Youth Sports Bar (YSB)

Summer Camp Volunteer- July 2023 – August 2023

I worked as a volunteer in the popup shop providing entertainment lounges, workshops, projects & events for children and young people. My responsibilities were;

- Planned and led recreational and educational activities for children like sports, arts, and crafts.
- Supervised children during all activities and always ensured their safety and well-being.
- Role modelled good behaviour and positive influence on campers.
- Observed campers for behavioural issues and responded appropriately.
- Maintained accurate attendance logs and reporting logs.
- Suggested the use of QR codes connected to a web form which will be used to login by the parents / guardians of the young campers, and a database management system will be used to keep track of all records and information being entered from the form.
- Set up and maintenance of all equipment needed for activities.
- Communicated with parents / guardians about their child's experience at camp.

Academic Qualifications

Southwark College	BTEC Computing Level 3	2024
Federal Government College	GCSE (6 in Math, 7 in English)	2022
Udemy	Full stack web development Training	90% Complete

Other Training

Mega Impact in collab with Jaybirght Studio	Photography Skills Development Bootcamp	2024

Awards and Achievements

Best student award in computing by Southwark College

Participant at the 2024 World Skills UK Web Development Competition

Hobbies

Skateboarding, coding, watching movies / anime's, socializing, exercise, and fitness.
